

This is the testimony of Darlene, a survivor of the Rwandan genocide

Three days passed with me living in these conditions. On the fourth day, I was rescued and taken to the hospital because I was injured. All these things happened when I was just 16 years old. I now have two children but the doctor told me to stop having children because of my condition, caused by the rape, it may be dangerous for me.

Today's Reading of the Testimonies marks the 15th Anniversary of the Rwandan genocide, in support of survivors like Darlene.
